

PEPPY TAPS

There in an instant

4 in 1 instant hot water taps with chilled and filtered water bringing convenience and style to any kitchen

 **HEIRLOOM**
THE FINISHING TOUCH

The benefits of **PEPPY TAPS**

- Peppy Taps is an Australian company whose founder have extensive experience in the Australian plumbing market. After comprehensive product development and testing Peppy Taps launch a range of instant hot water taps that combine convenience and style in one tap
- One tap that replaces not just the kettle but traditional kitchen taps too. Less clutter in the kitchen and only one hole to drill in your benchtop for easier installation. Ideal for a minimalist modern kitchen or where there is limited worktop space. Perfect at home or in the workplace dining/lunchroom
- The 4 in 1 functionality of a Peppy Tap means that it is the only tap needed in the kitchen and it will provide four functions to make it quicker and easier to get on with the multiple demands placed on today's modern kitchen
- The Peppy Tap's stylish design will make it an elegant centrepiece for the kitchen elevating the overall design of the kitchen
- 5 Colour options ensures the Peppy Tap can be incorporated into any kitchen design and proudly take its place within the overall interior design
- A Peppy Tap will save time. You can instantly pour boiling water directly from the tap. The annoying wait for the kettle to boil, or boiling a saucepan on the hob is a thing of the past. A Peppy Tap helps you get on with your day.
- Workplace efficient: save time and improve both staff wellbeing and productivity with instantly available hot (and chilled*) water
- A Peppy Tap will reduce your water waste & save electricity because you will heat and pour only the quantity of water that you need, rather than over or under-filling a kettle. Always pouring the required amount of water means instant hot water taps are a more environmentally sustainable option while also helping you save more energy than using a traditional kettle.
- A calcium and carbon antibacterial filter will improve the water purity, removing lead from water

* Chilled model

**A Peppy tap makes life
around the kitchen
that extra bit easier.**

**A Peppy Tap will
become a versatile
family favourite**

The benefits of **PEPPY TAPS**

- Enjoy the ease and accessibility of a Peppy Tap - instant access to boiling and filtered chilled* water.
- A Peppy Tap will be an immediate family favourite with a wide range of versatile uses:
 - Improve your hydration with filtered or chilled* water being instantly accessible
 - Make hot drinks to your preferred temperature using pre set temperature settings
 - Quickly blanch vegetables to loosen the skin or to prepare vegetables for the freezer
 - Speed up preparation of pasta and rice
 - Easier cleaning of stubborn chopping board stains or greasy pots and pans
- Built in safety. Peppy Taps come with child friendly, safety sprung handles and insulated sides.
- Compact under counter units. Peppy Taps smaller size boiling tanks and compact chiller units fit nicely in the under sink area and can be located separately
- Enjoy peace of mind with the assurance of testing and certification to Australian and New Zealand Standards.

Built in Safety

Peppy Taps dispense near-boiling water and have been carefully designed with practicality and safety in mind so that it can be used by all the family.

- More child proof than a boiling kettle – Peppy Taps have a spring loaded handle on the boiling water handle to ensure it cannot be accidentally turned on. To activate the boiling water, the safety button must be held down and twisted and kept in place until you are finished pouring. This system ensures that boiling water isn't left running or the handle isn't knocked by accident.
- Water pressure is also slightly lower than a traditional tap to prevent the splashing of boiling water
- The Anti Scald tap outlet - does not get hot when boiling water runs through the tap.
- Flow restrictors for both the hot and cold mains inlets ensures incoming water pressure is kept at the right level for both the boiler & chiller.
- Auto shut down is activated if the boiler is empty
- Vented design on the boiler prevents pressure build up in the boiler which could be a safety hazard and removes the requirement for cabinet vents.

OPTION 1

4 in 1 **Filtered** Tap

- Filtered Boiling Water (to 98° Celsius)
- Filtered Ambient
- Hot Mains
- Cold Mains

OPTION 2

4 in 1 **Chilled** Tap

- Filtered Boiling Water (to 98° Celsius)
- Filtered Chilled
- Hot Mains
- Cold Mains

Filtered Water 4 in 1 tap

The Peppy filtered water tap offers the benefit of instant hot water and filtered water ensuring the convenience of instant near boiling water with the taste and health benefits of filtered water

Functions

- 1 Filtered Boiling Water (to 98° Celsius)
- 2 Filtered ambient
- 3 Hot Mains
- 4 Cold Mains

There is an important benefit having the filter water function operate separately from hot and cold tap water functions. This feature does not reduce the water pressure for hot and cold water and does not increase the frequency of replacing filters by supplying filtered water when not required.
